

Allie Caton

Full Stack Software Engineer

(310) 601-6103 • alliecaton3@gmail.com • San Diego, CA

github.com/alliecaton • linkedin.com/in/alliecaton/ • alliecaton.com

OBJECTIVE

Capitalize on curiosity and creativity with like-minded teams to create modern technical solutions that delight users.

QUALIFICATIONS

Combined software engineering and technical project management experience, and a drive to constantly expand my development toolbox.

EXPERIENCE

Mainstay — Full Stack Software Engineer

March 2024 - Current

- Contribute to a large React/Typescript frontend for internal and customer-facing chatbot/AI messaging platform.
- Contribute to large Django REST API and Node.js services to support real-time chat within customer platform.
- Work with data across MongoDB and Postgres databases.
- Highly collaborating with engineering teammates & product team.

The Atlas for Cities — Frontend Software Engineer

August 2021 - October 2023

- Main frontend contributor on four applications with varying tech stacks that covered Vue3, Vue2, Nuxt, Laravel, TypeScript, Cypress, and Wordpress.
- Worked with product leaders to create UI designs using Sketch and Zeplin.
- Brainstormed and collaborated with leadership on product conception.

FableVision Studios

Contract UI Engineer

September 2023 - Ongoing

- Created two financial literacy learning games using Vue 3 and Cordova.
- Converted four Unity games into JavaScript for better web compatibility using React, TypeScript, and Cordova.

Associate Producer

May 2018 - October 2020

- Led production pipeline on video game and animation projects. Managed project scope, art and writing, technical development, and final delivery.

EDUCATION

Flatiron School – Software Engineering Program, 2020

Boston University – Bachelors in Communications, 2018

SIDE PROJECTS

Digital Garden

– Personal website for sharing coding and creative thoughts.

– **Backend:** NodeJs, Express, Postgres, Prisma

– **Frontend:** Vue3, Vite, TypeScript, Markdown
